HARD WORK AND A
COMMITMENT TO CRAFTING
THE HIGHEST QUALITY
AMERICAN MADE APPAREL
AND HEADWEAR.

BAYSIDE®
THE TRUE AMERICAN MADE TEE™

WHAT IT TAKES TO BE THE LARGEST VERTICAL APPAREL MANUFACTURER IN AMERICA

1 Cotton is grown and harvested in USA.

2 The harvested cotton is processed into yarn in North Carolina.

3 The yarn is sustainably transported to California to be knitted by US railroad.

4 The yarn is knit into fabric rolls at our knitting plant and prepped for dyeing. All material waste is recycled.

5 The fabric is taken to our dye plant to be dyed and finished. Our state of the art facility conserves water, minimizes waste and recycles all materials.

6 The dyed fabric goes through the final step called finishing to ensure our garments look and feel the best.

7 The dyed fabric is transported to our cutting plant. The fabric is then cut using Bierrebi automated die cut machines. All material waste is recycled.

8 Cut pieces are sewn into final garments using the latest technology at our sewing plant. All material waste is recycled.

9 Garments are transported to our nationwide distribution centers ready to ship.

UNISEX BAYSIDE GARMENT DYED CREW

WHAT IS GARMENT DYEING?

Garment dyeing is a process in which t-shirts are dyed after the shirt has been manufactured, rather than dyeing the fabric before cutting and sewing the garments. We use two types of dye: Pigment and Direct/Reactive dyes. The nature of the garment dyeing process allows us to achieve a softer, washed vintage feel. The process of garment dyeing is so unique, no dye lot is exactly the same, creating variances in the specs and color that will make every batch perfectly imperfect!

When printing garment dyed shirts, it is suggested to use inks and procedures that prevent dye migration.

To avoid possible pigment staining on light or white colored garments, we highly recommend washing these garments with only like-colored garments.

ALL GARMENTS ARE DYED TO ORDER RIGHT HERE IN LOS ANGELES

- 200 piece minimum per color, 6 pieces per size
- Ships within 7-14 days after receipt of order
- Quantity Tolerance +/- 5%
- 5.9 oz. after garment dye
- 20/1 combed ring-spun USA cotton
- S-3XL
- Fabric knit, dyed and cut in USA
- Sewn in Mexico

9515
UNISEX BAYSIDE GARMENT DYED CREW

Due to the nature of
garment dyeing, each shirt
can vary in spec and color.

BAYSIDE CUSTOMIZATION

• CUSTOM

Bayside offers a wide assortment of customized garments accommodating to your styling specifications, colors, fabrics, pattern and cuts! We can also custom match any color!

• MINIMUMS

Minimums for custom orders start at just 1,000pcs, but can vary depending on the customization needed.

• LEAD TIME

Lead times for custom orders take approximately 8 weeks after receipt of order and final sample approval.

• PRIVATE LABEL

Let our private label program help elevate your brand! Low minimums starting at only 50 pieces!

BAYSIDE APPAREL TERMS

- **1X1 RIB** – Also, 2x2 rib knit trim. The width of each rib is the same as the width between each rib. This helps the garment retain its elasticity.
- **BRUSHED COTTON** – Cotton fabric that is brushed to remove all the excess lint and fibers from the fabric, leaving an ultra soft, smooth finish.
- **CAP SLEEVES** – A length of sleeve that hits the upper arm between the elbow and the shoulder. Generally used for ladies' garments.
- **CARDING** – A fiber cleaning process in yarn spinning.
- **COMBED COTTON** – Cotton yarn that has been combed to remove short fibers and straighten or arrange longer fibers in parallel order resulting in a smooth yarn used in finer garments.
- **COVER STITCH** – Background of solid embroidery. Background behind copy.
- **COVER STITCHED ARMHOLE SEAM** – Usually found in knit shirts, refers to the inside armhole seam being serged or finished.
- **DIRECT EMBROIDERY** – The process of sewing a name or design directly to a garment.
- **DOUBLE KNIT** – A knit fabric of double thickness.
- **DOUBLE-NEEDLE STITCHED** – A finish used on a sleeve and/or bottom hem that uses two needles to create parallel rows of visible stitching. It gives the garment a cleaner, more finished look and adds durability.
- **DRAPABILITY** – A fabric's ability to hang gracefully in a finished product.
- **FINISH** – General term for processes used in converting raw goods into finished cloth. Bleaching, mercerizing, steaming, singeing, and dyeing are typical finishing processes.
- **FULL CUT** – Refers to a garment's fit as being generous and roomy.
- **GARMENT DYED** – Apparel dyed in garment form rather than fabric form. This is a popular fashion treatment used by designers.
- **HAND** – The tactile qualities of a fabric. The way it feels to the touch - soft, firm, elastic, etc.
- **JERSEY KNIT** – A single-knit, plain-stitched fabric with a face side that is markedly different from the back side.
- **KNITS** – Fabrics constructed by interlocking a series of loops by hand or machine. Knitted fabrics tend to mold and fit easily to body shape: woven fabrics, in contrast, drape.
- **NECK TAPE** – Protective band of tape sewn over the seam between the shell and the collar for a more comfortable feel to the garment.
- **OPEN-END YARN** – Is a technology for creating yarn without using a spindle.
- **PIQUE** – Knit fabric with raised lengthwise "cords" which are part of the weave.
- **RAGLAN SLEEVES** – Sleeves are all one piece from collar to cuff, allowing for ease of movement.
- **RECOVERY** – The capacity of a fabric to return to its original dimensions after being stretched out of shape.
- **RIB KNIT** – A textured knit that has the appearance of vertical lines. It is highly elastic and retains "memory".
- **RING SPUN YARN** – Yarn made by continuously twisting and thinning a rope of cotton fibers. The twisting makes the short hairs of cotton stand out, resulting in a stronger yarn with a significantly softer hand.
- **SHRINKAGE** – Terms refers to the amount of size reduction in a 100% cotton item. Most 100% items have been pre-shrunk and no more than a 5-7% shrinkage should be expected.
- **TRIBLEND** – The process of creating one fabric of 3 components. Usually: 50% polyester / 25% combed ring-spun cotton / 25% rayon or 50% polyester / 38% combed ring-spun cotton / 12% rayon.
- **TUBULAR FABRIC** – A woven, knitted or braided fabric made in circular seamless form. Jersey is usually knit as tubular fabric.
